# MANUAL FOR CONFIGURING Wi-Fi ON WINDOWS LUMIA

Once the confirmation mail for the activation of your Wi-Fi account is received, follow these steps.
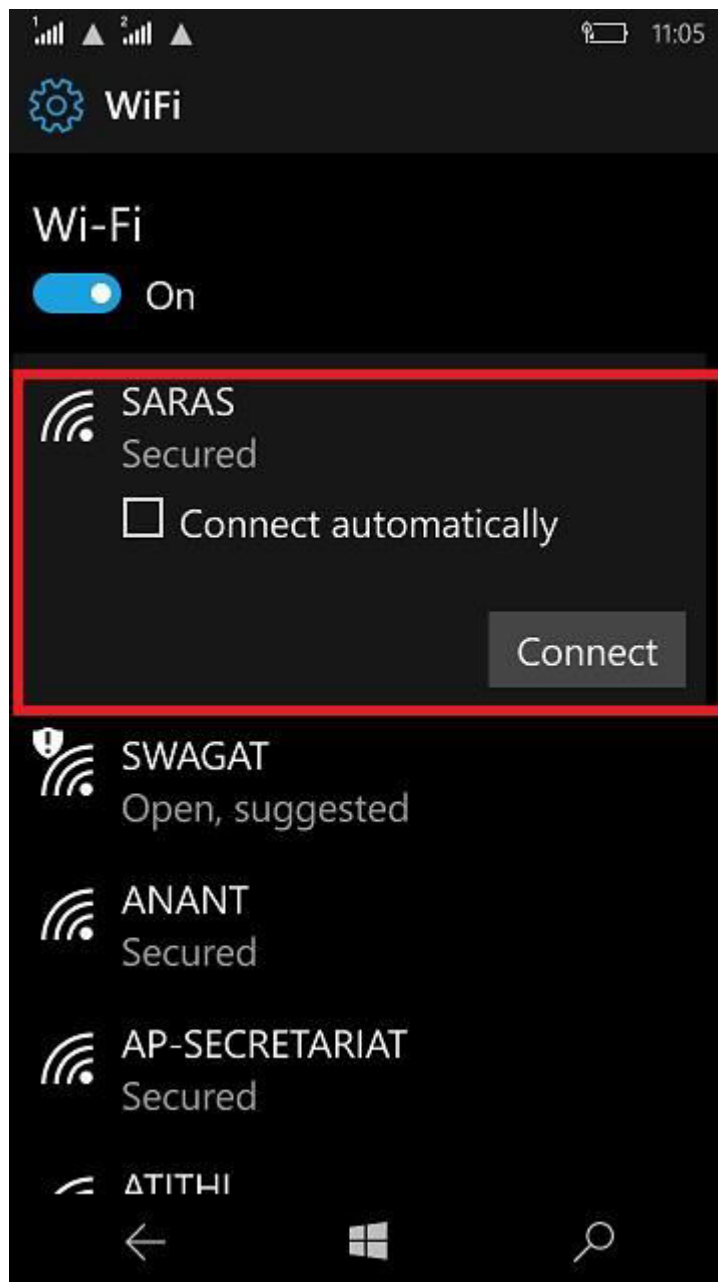

Step1: Open the email containing the Digital Certificate (DC) and install it on your device by tapping on the attachment file with the extension .pfx Also note down its Private Key/Password received on mobile after acknowledgement of mail.

Step2: Now install Digital certificate received from VPN by tapping on Install button. Enter the Private Key/Password of Digital Certificate when prompted.

Step3: Open **Settings** tab on your windows lumia, and choose **network & wireless**.Then tap on **Wi-Fi** tab. Switch Wi-Fi **ON**.
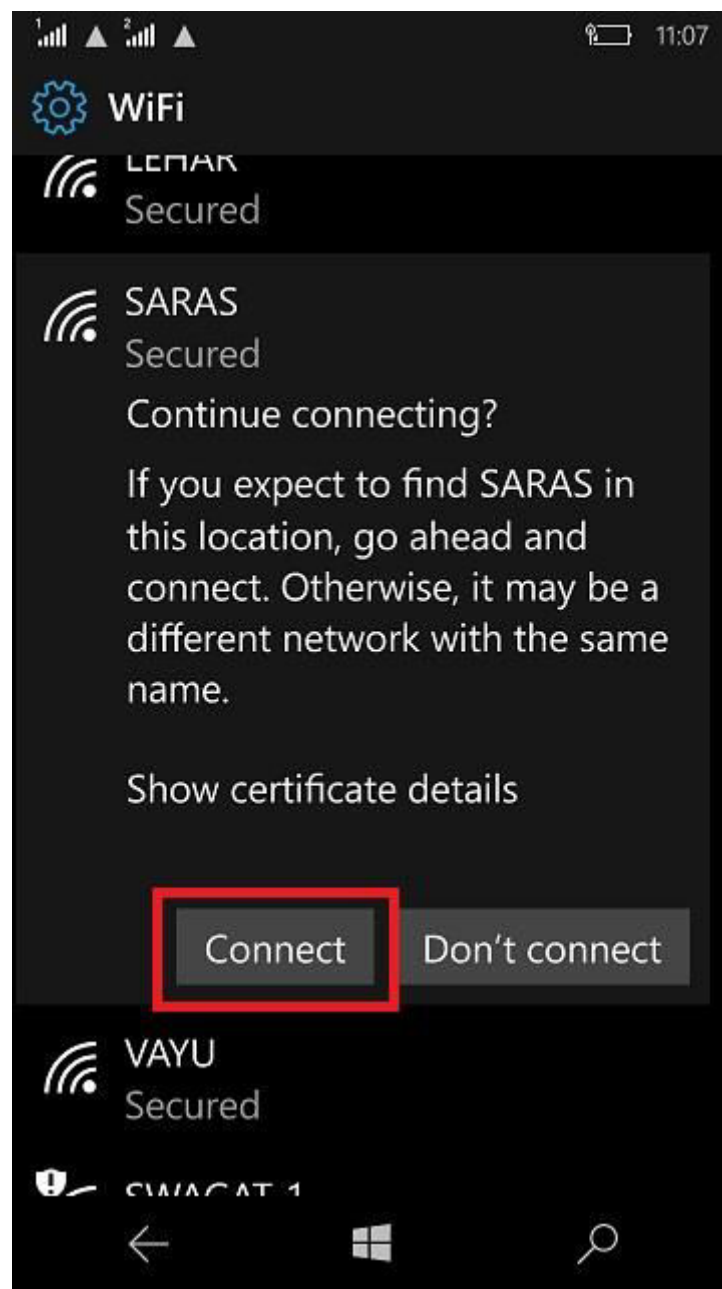

Step4: The available wireless networks get displayed. Tap on respective **SSID**. **Eg – SARAS** and then click on **connect.**
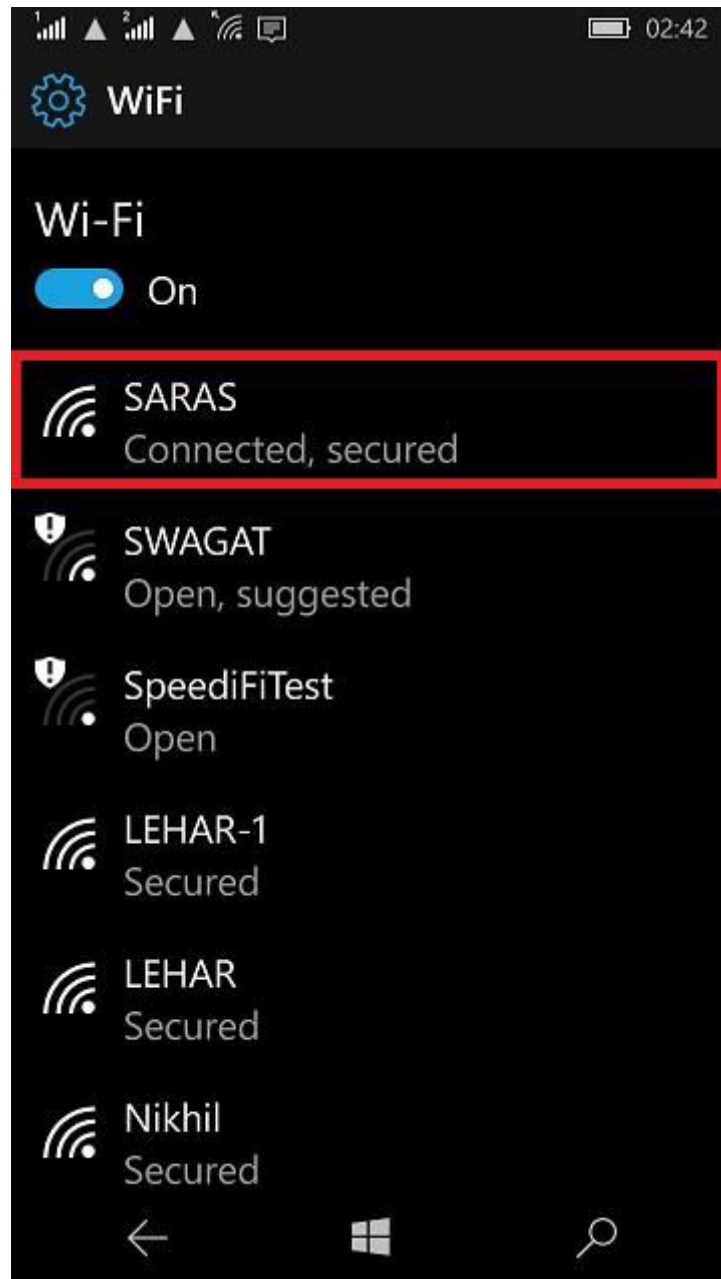

Step5: Skip your username and password and instead click on **connect using a certificate.**

<u>Step6:</u> It will automatically select the certificate, so again click on **connect.**

Step7: The device is connected to NIC Wi-Fi network with **SSID- SARAS.**

HAPPY BROWSING!!!

*   **In case of any issues, please mail to wifi@nic.in.**
