MANUAL FOR CONFIGURING Wi-Fi ON IOS DEVICES

Once the confirmation mail of the activation of your Wi-Fi account is received, follow these steps.

Step1: Open the email containing the Digital Certificate (DC) and install it on your device by tapping on the attachment file with the extension .pfx . Also note down its Private Key/Password.
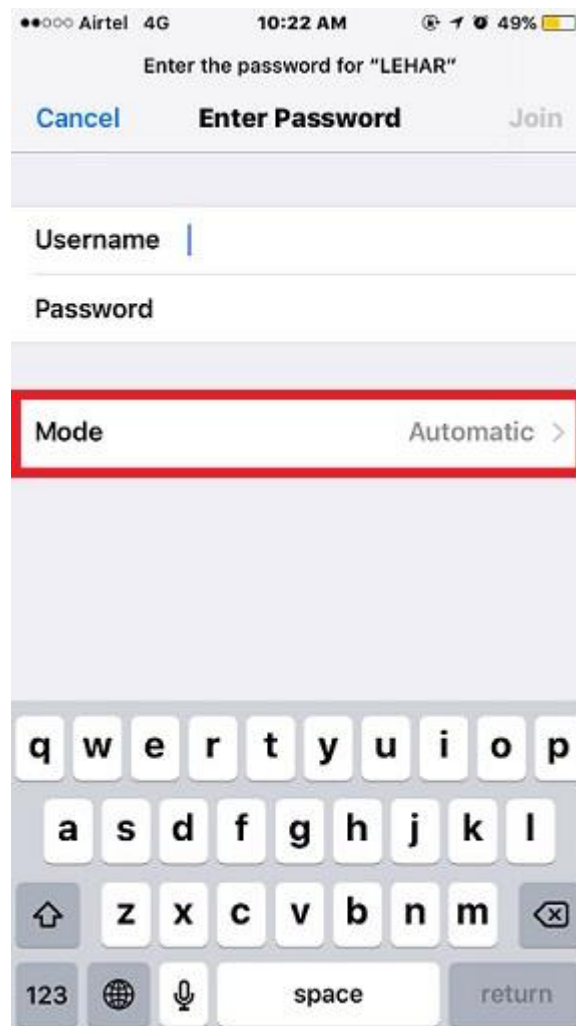

Step2: Now install Digital certificate received from VPN by tapping on Install button. Enter the Private Key/Password of Digital Certificate when prompted.

Step3: Open Settings tab on your apple device, and then tap on Wi-Fi tab. Switch Wi-Fi on. The available wireless networks get displayed.
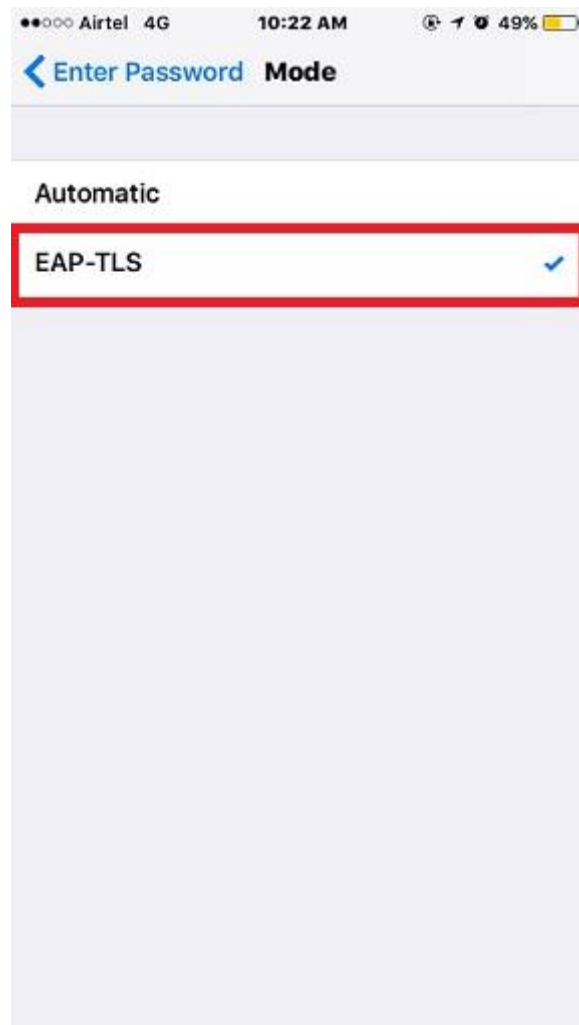

Step5: Tap on respective **SSID**. **Eg – LEHAR.**

Step6: Now Tap on **Mode.**

Step7: Choose **EAP-TLS** mode and then tap on **Enter Password.**

Step7: Click on **Identity.**

Step8: Tap on the Digital Certificate received from VPN. **Eg- xyz.**
Then tap on **Enter Password.**
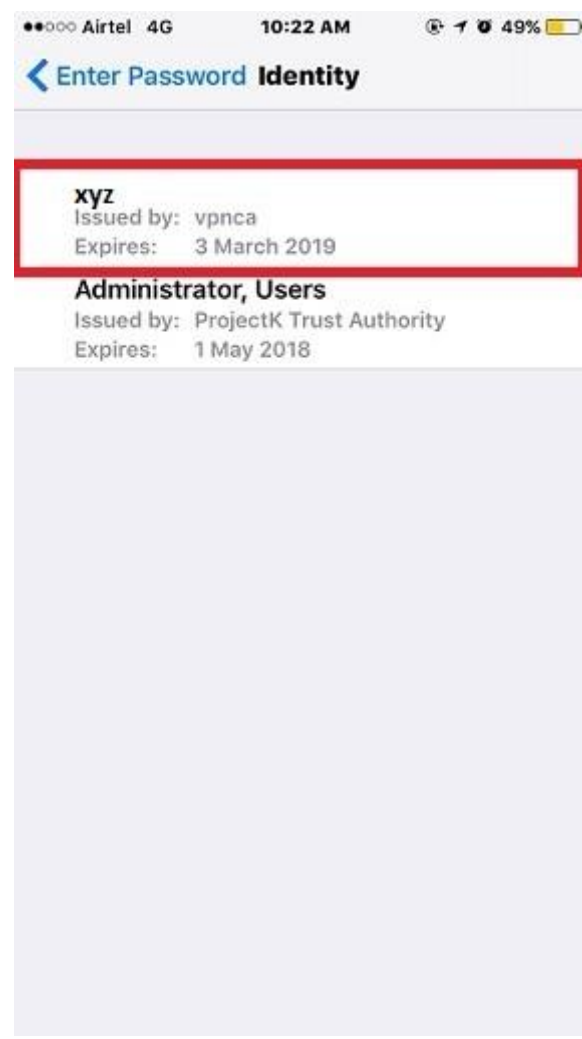

Step9: In the **Username** field enter the Name (Common Name (CN) of the DC) which is optional and then tap join.
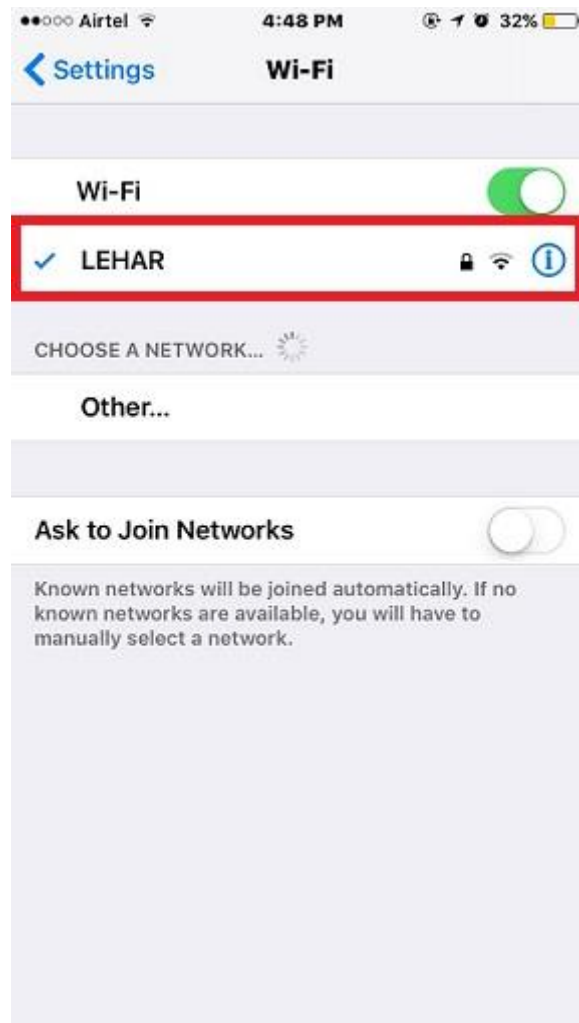

Step10: Tap **trust** on the Certificate confirmation window.

Step11: The device is connected to NIC Wi-Fi network with SSID- LEHAR.

HAPPY BROWSING!!!

* In case of any issues, please mail to wifi@nic.in.
